Rick Prol paints a world many of us are afraid to even imagine-- the dark side of our lives-- a brutal, twisted part of ourselves that demands we face the ugliness of the world. With a sickly-sweet smile his work dares you to consider a reckless universe full of a raw energy that is completely unafraid of exploring the darkness.

Prol has produced a complicated work combining silkscreen and lithography for his first limited edition print. Using New York City's seedy east village as a starting point, Prol's work goes on to speak to much larger subjects.
